Employee Benefits Complete Guide

Comprehensive Guide to Insurance, Leave, Compensation & Perks | 2026 Edition

1. Health Insurance Benefits

1.1 Mandatory Social Health Insurance (BHYT)

In accordance with Vietnamese law (Law on Health Insurance No. 25/2008/QH12, as amended by Law No. 46/2014/QH13), all TechViet employees are enrolled in the national Social Health Insurance (Bao Hiem Y Te — BHYT) program. The contribution rate is 4.5% of the employee's gross salary (capped at 20 times the base salary), split between the employer (3%) and the employee (1.5%). This contribution is automatically deducted from the monthly payroll and remitted to the Social Insurance Fund by the Finance department. BHYT covers examination and treatment at public hospitals and designated private facilities. The reimbursement rate depends on the level of the medical facility and whether the employee has a referral: 80% reimbursement at the registered primary care facility (designated on the BHYT card), 60% at a higher-level facility without referral, and 40% at a facility in a different province without referral. Emergency treatment is reimbursed at 80% regardless of facility level. Important: employees must register their preferred primary care facility when they receive their BHYT card — the HR team will assist with this during onboarding. To change the registered facility, submit a request to HR at least 30 days before the start of the next quarter. Common items NOT covered by BHYT include: cosmetic procedures, experimental treatments, dental care beyond basic extractions, vision correction (glasses, contact lenses, LASIK), traditional medicine not on the approved treatment list, and treatment at non-designated private facilities without a referral.

1.2 Supplementary Health Insurance (Bao Minh Premium Care)

TechViet provides supplementary health insurance through Bao Minh Insurance Corporation's Premium Care plan to all full-time employees (applicable from the first day of employment) and their dependents (spouse and children under 18, or under 23 if enrolled in full-time education). The annual premium is fully covered by TechViet for employees at the Gold tier; employees may upgrade to the Platinum tier by paying the difference of VND 3,200,000/year through payroll deduction. Dependent coverage is subsidized at 50% by TechViet. The Gold tier includes: inpatient treatment coverage up to VND 500,000,000 per person per year at any hospital in Vietnam (including international hospitals such as FV Hospital, Vinmec, and Columbia Asia), outpatient treatment coverage up to VND 30,000,000 per person per year (including specialist consultations, diagnostic imaging, and prescribed medications), dental coverage up to VND 8,000,000 per person per year (including cleanings, fillings, root canals, and basic orthodontics for dependents under 18), maternity coverage up to VND 50,000,000 per pregnancy (including prenatal care, delivery, and postnatal checkups for 6 weeks after delivery), and an annual health checkup at one of TechViet's three partner hospitals (FV Hospital HCMC, Vinmec Central Park, or Hoan My Saigon). The Platinum tier adds: coverage at international hospitals outside Vietnam (within Asia) up to VND 1,000,000,000 per year, increased outpatient coverage to VND 60,000,000 per year, vision coverage up to VND 5,000,000 per year (including prescription glasses, contact lenses, and eye exams), access to the Bao Minh concierge service for appointment scheduling and medical translation, and a 24/7 global medical assistance hotline with medical evacuation coverage. Claims process: for partner hospitals (FV, Vinmec, Hoan My), TechViet has a direct billing arrangement — simply present your Bao Minh insurance card at the reception desk and the hospital will bill Bao Minh directly (no out-of-pocket payment required for covered services). For non-partner hospitals, submit a claim form (available on the HR Portal) within 30 days of treatment, attaching original receipts, medical reports, and prescriptions. Reimbursement is processed within 15 business days to the employee's registered bank account. Pre-authorization is required for: any inpatient admission expected to cost more than VND 50,000,000, surgical procedures, and treatment outside Vietnam. Contact Bao Minh's 24/7 hotline (1900-55-88-83) for pre-authorization.

1.3 Mental Health Support Program

TechViet recognizes the importance of mental health and wellbeing, especially in the fast-paced technology industry. In 2025, we launched a comprehensive mental health support program in partnership with Mind Matters Vietnam, a licensed psychological counseling practice. The program includes: up to 12 individual counseling sessions per employee per year (completely free of charge, with no co-pay), available both in-person at Mind Matters' District 1 and District 7 offices, and via secure video call (using a HIPAA-compliant platform). Sessions are available in Vietnamese and English, with additional languages upon request. The program also includes: quarterly mental health workshops on topics such as stress management, work-life balance, managing anxiety in high-pressure environments, and building resilience. These workshops are held during working hours and attendance is encouraged but not mandatory. A 24/7 crisis hotline operated by Mind Matters' licensed psychologists, available for immediate support during mental health emergencies. Confidentiality: all interactions with the mental health support program are strictly confidential. TechViet does not receive any information about which employees use the service, the nature of their concerns, or the outcomes of counseling sessions. The only information shared with TechViet is aggregate utilization statistics (e.g., 'X% of employees used the service this quarter') for program evaluation purposes. Managers are trained to recognize signs of mental health challenges and to direct employees to the program without pressuring them to disclose personal information.

2. Leave Policies

2.1 Annual Leave

TechViet provides annual leave entitlements that exceed the statutory minimum under Vietnamese labor law (Labor Code 2019, Article 113). The entitlement is based on the employee's job level and years of service: All employees receive a minimum of 15 working days per year (statutory minimum is 12 days). After 3 years of continuous service, employees receive an additional 2 days, bringing the total to 17 days. After 5 years, the entitlement increases to 20 days. Senior managers (Director level and above) receive 25 days from their start date. Additionally, per Article 114 of the Labor Code, employees receive 1 additional day for every 5 years of cumulative work experience (including experience at previous employers, subject to documentation). Annual leave accrues monthly at a rate of 1/12 of the annual entitlement. Unused leave can be carried over to the following year up to a maximum of 5 days, and any remaining unused leave beyond the carryover limit will be paid out at the employee's daily rate in the January payroll. Leave requests must be submitted through the HR Portal at least 3 business days in advance for planned absences. For absences of 5 or more consecutive days, approval from both the direct supervisor and department head is required. During peak business periods (defined as the last 2 weeks of each quarter and the annual sales event in November), leave requests may be subject to additional restrictions based on business needs — the department head will communicate any such restrictions at least 2 weeks in advance.

2.2 Sick Leave and Medical Leave

Sick leave is governed by the Social Insurance Law (Law No. 58/2014/QH13) and supplemented by TechViet's enhanced sick leave policy. Under the statutory scheme, employees contributing to Social Insurance are entitled to: 30 days of sick leave per year (for employees with less than 15 years of Social Insurance contributions) or 40 days per year (for those with 15+ years). Sick leave is paid at 75% of the average salary of the preceding 6 months, funded by the Social Insurance Fund (not by TechViet directly). TechViet supplements this with: full salary top-up for the first 10 sick days per year (TechViet pays the 25% difference between the Social Insurance benefit and 100% salary), a 'wellness day' benefit of 3 additional days per year that can be used for sick leave without a medical certificate (self-certification is sufficient), and extended medical leave of up to 180 days at 65% salary for serious illnesses requiring prolonged treatment (beyond the statutory entitlement). For sick leave of 3 or more consecutive days, a medical certificate from a licensed physician is required. The certificate must be submitted to HR within 5 business days of returning to work. For wellness days, submit a self-certification form on the HR Portal within 24 hours of the absence.

2.3 Maternity, Paternity, and Parental Leave

Maternity leave: Female employees are entitled to 6 months (180 days) of maternity leave as stipulated by the Labor Code 2019. This includes both pre-delivery rest (up to 2 months before the expected due date, if medically recommended) and post-delivery leave. During maternity leave, the employee receives 100% of their average salary for the preceding 6 months, paid by the Social Insurance Fund. Additionally, a lump-sum maternity allowance equal to 2 months of the base salary is paid upon delivery. TechViet supplements this with: a one-time 'new parent bonus' of VND 10,000,000, a gradual return-to-work program allowing reduced hours (6 hours/day instead of 8) for the first month after returning, and priority access to the TechViet Kids daycare partnership with SaigonKids (20% discount on tuition). Paternity leave: Male employees are entitled to 5 working days of paternity leave for a normal delivery, or 7 working days for a cesarean delivery or multiple births. TechViet extends this to 10 working days for all deliveries, with the additional days paid by TechViet at 100% salary. Paternity leave must be taken within 30 days of the child's birth and can be taken in non-consecutive blocks with supervisor approval. Adoption leave: Employees who adopt a child under 6 months of age are entitled to leave equivalent to maternity/paternity leave from the date the adoption is legally finalized. The Social Insurance Fund covers the same benefits as for biological parents, and TechViet's supplementary benefits (new parent bonus, gradual return, daycare discount) apply equally to adoptive parents.

3. Compensation and Financial Benefits

TechViet's compensation philosophy aims to position total compensation at the 75th percentile of the Vietnamese technology market, using data from the annual Mercer Vietnam Technology Compensation Survey and the TopDev Vietnam IT Salary Report. Total compensation consists of four components: base salary (fixed monthly payment), performance bonus (variable, based on individual and company performance), equity compensation (for eligible roles), and benefits (insurance, leave, and perquisites as described in this handbook). Base salary is reviewed annually in April, with adjustments effective from May 1st. The review considers: individual performance rating from the annual review cycle (conducted in Q1), market benchmark data for the role and level, internal equity (ensuring fair pay across similar roles), and the company's overall salary increase budget (typically 8-12% of total payroll, approved by the Board). Employees rated 'Exceeds Expectations' or above typically receive above-average increases; employees rated 'Meets Expectations' receive the standard increase; and employees rated 'Needs Improvement' may receive a below-average increase or no increase, accompanied by a performance improvement plan. Performance bonus: all full-time employees are eligible for an annual performance bonus paid in February based on the previous year's results. The target bonus is expressed as a percentage of annual base salary and varies by level: Individual Contributors (L1-L3): 10% target, Senior Individual Contributors (L4-L5): 15% target, Managers (M1-M2): 20% target, Directors (D1-D2): 25% target, VP and above: 30% target.

The actual bonus payout is determined by multiplying the target bonus by two factors: the individual performance multiplier (0x to 2x, based on the performance rating) and the company performance multiplier (0x to 1.5x, based on revenue and profitability targets approved by the Board). For example, an L4 engineer with a base salary of VND 40,000,000/month, a target bonus of 15%, an individual multiplier of 1.3 (Exceeds Expectations), and a company multiplier of 1.1 would receive: (40,000,000 x 12) x 15% x 1.3 x 1.1 = VND 102,960,000.

4. Learning and Development Budget

TechViet allocates a personal learning and development (L&D;) budget to every full-time employee, reflecting our belief that continuous learning is essential for both individual growth and company competitiveness. The annual L&D; budget is: VND 15,000,000 for Individual Contributors (L1-L5), VND 25,000,000 for Managers (M1-M2), and VND 40,000,000 for Directors and above (D1+). The budget can be used for: professional certifications (AWS, GCP, Azure, PMP, Scrum, CISSP, etc.) including exam fees and preparation materials, online courses and subscriptions (Coursera, Udemy, O'Reilly, Pluralsight, etc.), conference attendance (including registration fees, travel, and accommodation for approved conferences), technical books and publications, language courses (English, Japanese, or other languages relevant to the employee's role), and university courses or degree programs (for employees pursuing a master's degree relevant to their role, TechViet will cover up to 50% of tuition, subject to a 2-year retention agreement). The approval process is: expenses under VND 5,000,000 require only the direct supervisor's approval; expenses between VND 5,000,000 and VND 15,000,000 require supervisor and department head approval; and expenses above VND 15,000,000 (possible only for Director+ budgets) require VP and CHRO approval. To request L&D; funding, submit a Learning Request form on the HR Portal specifying the activity, relevance to your current role or career development plan, expected outcomes, and cost breakdown. Requests are typically processed within 5 business days. Unused L&D; budget does not carry over to the following year.

5. Employee Stock Ownership Plan (ESOP)

TechViet's Employee Stock Ownership Plan (ESOP) is designed to align employee interests with long-term company success and reward employees for their contributions to growth. The ESOP was established in 2022 with a pool of 10% of the company's total shares, approved by the Board of Directors and shareholders. As of January 2026, approximately 6.5% of the total pool has been granted, leaving 3.5% available for future grants. Eligibility and grant guidelines: ESOP grants are discretionary and typically offered to employees at L4 level and above, though exceptional grants to high-potential L3 employees may be approved by the CEO. New hire grants are based on the employee's level and role: L4 Senior Engineer: 2,000-4,000 shares, L5 Staff Engineer: 5,000-8,000 shares, M1 Engineering Manager: 6,000-10,000 shares, D1 Director: 15,000-25,000 shares, VP: 30,000-50,000 shares. Refresh grants may be awarded during the annual compensation review to retain high performers or adjust for market competitiveness. Vesting schedule: all grants follow a 4-year vesting schedule with a 1-year cliff. After the 1-year cliff, 25% of the grant vests, and the remaining 75% vests monthly over the following 36 months. Vesting is contingent on continued employment — if an employee leaves TechViet (voluntarily or involuntarily), unvested shares are forfeited, and the employee has 90 days from their last working day to exercise their vested options. Valuation and exercise: since TechViet is a private company, the share price for option grants is determined by an independent 409A-equivalent valuation conducted annually by PwC Vietnam. The most recent valuation (December 2025) set the fair market value at VND 82,000 per share, up from VND 65,000 in December 2024 (representing 26% appreciation). Employees may exercise vested options at the original grant price (strike price) and hold the shares, or wait for a liquidity event (IPO, acquisition, or secondary sale). TechViet currently conducts an annual secondary sale event in Q4, where employees can sell vested shares to approved buyers (typically existing investors or new strategic investors) at the most recent valuation price. Tax implications: under Vietnamese tax law, the gain from exercising stock options (difference between fair market value and strike price at exercise) is treated as employment income and subject to personal income tax at the employee's marginal rate. TechViet will withhold and remit the applicable taxes at the time of exercise. Employees are strongly advised to consult with a tax advisor before exercising options, as the tax implications can be significant for large grants.
