

# OKR & Performance Dashboard — Q1 2026

Objectives, Key Results, and Team Performance Metrics

People & Culture Team + Engineering Leadership

Reporting Period: January – March 2026 | Classification: Internal

## 1. Company-Level OKRs — Q1 2026

TechViet's Q1 2026 company OKRs are set by the executive team and cascade into department-level objectives. Each objective has 2-4 measurable key results with a target score of 0.7 (stretch goals). Scores below 0.4 trigger a root-cause review.

| Objective                           | Key Result                                               | Target         | Actual Q1         | Score | Status   |
|-------------------------------------|----------------------------------------------------------|----------------|-------------------|-------|----------|
| O1: Accelerate Revenue Growth       | KR1: Close 8 new enterprise deals (>\$100K each)         | 8 deals        | 6 deals           | 0.75  | On Track |
|                                     | KR2: Increase recurring revenue to 65% of total          | 65%            | 61%               | 0.62  | At Risk  |
|                                     | KR3: Expand into 2 new industry verticals                | 2 verticals    | 1 (education)     | 0.50  | Behind   |
| O2: Deliver World-Class Engineering | KR1: Achieve 95% sprint completion rate across all teams | 95%            | 91%               | 0.82  | On Track |
|                                     | KR2: Reduce production incidents (P1/P2) by 30% vs Q4    | 30% reduction  | 22% reduction     | 0.73  | On Track |
|                                     | KR3: Launch ChatAssist MVP to 50 internal beta users     | 50 users       | 42 users (beta)   | 0.84  | On Track |
|                                     | KR4: Achieve 80% automated test coverage on all services | 80%            | 74%               | 0.68  | At Risk  |
| O3: Build a Talent Magnet Culture   | KR1: Reduce voluntary attrition to <8% annualized        | <8%            | 6.2%              | 0.90  | Achieved |
|                                     | KR2: Achieve eNPS score of 45+                           | 45             | 52                | 1.0   | Achieved |
|                                     | KR3: Fill 15 open engineering positions (avg <35 days)   | 15 hires, <35d | 12 hires, 38d avg | 0.65  | At Risk  |

## 2. Engineering Department OKRs

### 2.1 Platform Engineering Team

| Objective                    | Key Result                                                      | Target     | Actual     | Score |
|------------------------------|-----------------------------------------------------------------|------------|------------|-------|
| Improve Platform Reliability | Achieve 99.95% API uptime (all services)                        | 99.95%     | 99.92%     | 0.80  |
|                              | Reduce mean time to recovery (MTTR) to <15 minutes              | <15 min    | 18 min     | 0.70  |
|                              | Complete migration of 3 services from Jenkins to GitHub Actions | 3 services | 3 services | 1.0   |
| Modernize Infrastructure     | Migrate 80% of workloads to ARM-based instances (cost savings)  | 80%        | 65%        | 0.65  |
|                              | Implement GitOps for all production deployments via ArgoCD      | 100%       | 85%        | 0.72  |

2.2 AI & Data Science Team

| Objective                    | Key Result                                                      | Target        | Actual                    | Score |
|------------------------------|-----------------------------------------------------------------|---------------|---------------------------|-------|
| Launch ChatAssist RAG System | Achieve retrieval accuracy >93% on benchmark dataset            | >93%          | 91.2%                     | 0.85  |
|                              | Response latency: TTFT <1.5s, full response <6s                 | TTFT <1.5s    | TTFT 1.3s, full 5.2s      | 0.90  |
|                              | Ingest 100% of internal documents (currently 2,847 files)       | 2,847 files   | 2,312 files               | 0.81  |
| Advance ML Capabilities      | Deploy 2 new ML models to production (recommendation + anomaly) | 2 models      | 1 model (recom mendation) | 0.50  |
|                              | Reduce model inference cost by 25% via quantization             | 25% reduction | 18% reduction             | 0.72  |

3. Individual Performance Snapshot — Engineering

Below is an anonymized performance distribution for Q1 2026 across engineering teams. Ratings follow the 1-5 scale defined in the Employee Handbook section 4.2.

| Rating          | Description                                                       | Target % | Actual % (Q1) | Headcou nt | Notes                              |
|-----------------|-------------------------------------------------------------------|----------|---------------|------------|------------------------------------|
| 5 — Exceptional | Consistently exceeds all expectations, strong culture contributor | 5-10%    | 7%            | 18         | VP approval required               |
| 4 — Exceeds     | Exceeds most expectations, delivers ahead of schedule             | 20-25%   | 24%           | 61         | Eligible for accelerated promotion |
| 3 — Meets       | Fully meets expectations, reliable contributor                    | 50-60%   | 55%           | 140        | Standard merit increase            |
| 2 — Developing  | Partially meets expectations, improvement plan recommended        | 10-15%   | 11%           | 28         | PIP discussion within 2 weeks      |
| 1 — Below       | Does not meet expectations, immediate PIP required                | 0-5%     | 3%            | 8          | HR review mandatory                |

4. Career Ladder Progression — Q1 Promotions

| Employee       | From Level         | To Level              | Department           | Effective Date | Salary Adjustment     |
|----------------|--------------------|-----------------------|----------------------|----------------|-----------------------|
| Tran Minh Duc  | L3 Senior Engineer | L4 Staff Engineer     | Platform Engineering | April 1, 2026  | +18% base + RSU grant |
| Le Thi Hong    | L2 Engineer        | L3 Senior Engineer    | AI & Data Science    | April 1, 2026  | +15% base             |
| Pham Van Khanh | L3 Senior Engineer | L4 Staff Engineer     | Backend Engineering  | April 1, 2026  | +18% base + RSU grant |
| Nguyen Duc Anh | L1 Junior Engineer | L2 Engineer           | Frontend Engineering | April 1, 2026  | +12% base             |
| Vo Thi Lan     | L3 Senior QA       | L4 Staff QA           | Quality Assurance    | April 1, 2026  | +16% base             |
| Do Thanh Tam   | L4 Staff Designer  | L5 Principal Designer | Design (UI/UX)       | April 1, 2026  | +22% base + RSU grant |

5. Learning & Development Metrics

| Metric                              | Q4 2025  | Q1 2026  | Change | Target         |
|-------------------------------------|----------|----------|--------|----------------|
| Average training hours per employee | 12.5 hrs | 14.2 hrs | +13.6% | 15 hrs/quarter |
| Learning budget utilization         | 62%      | 71%      | +9pp   | 80%            |
| Internal tech talks delivered       | 8        | 11       | +37.5% | 12/quarter     |
| External certifications earned      | 15       | 22       | +47%   | 20/quarter     |
| Mentorship program participation    | 34 pairs | 41 pairs | +20.6% | 50 pairs       |
| Eng blog posts published            | 3        | 5        | +67%   | 4/quarter      |
